EXPLOR TO BEGIN NEW DIAMOND DRILLING PROGRAM ON EASTFORD LAKE PROPERTY

Rouyn-Noranda, Canada, June 9, 2010.

Explor Resources Inc. is pleased to announce the beginning of a 2700 meter drilling program on the Eastford Lake Gold Property, program that will be focussing on intersecting the gold bearing shear zones that are intersected by a major fault structure that is trending in a north north easterly direction and through the Lynx Gold Zone.

The main vein of the Lynx Gold Zone contains visible gold and appears to strike in a north-north westerly direction and is steeply dipping to the south south-westerly direction. The property is situated in the Kerrs, Warden, Milligan Townships and the Rayner Lake area, south-west of Lake Abitibi, Ontario, 90 km east of the Timmins-Porcupine gold mining camp. The Eastford Lake Property consists of 170 contiguous unpatented mining units for a total of 3,100 hectares.

A recent study realized by Robert Tremblay of Val-d'Or focussed on mapping all structural features and their correlation with gold mineralization. As a result of this review, a first interpretative geological map of the gold-bearing zone was developed. The drilling program is based on the positive results that were obtained with this study. The program is designated to determine the strike of the high grade mineralization that was found in Hole #7.

The discovery of the Lynx Gold Zone in this largely unexplored area represents a major technical success. As a possible new gold camp associated with the regional Destor-Porcupine Fault, it requires further systematic drilling to test and improve the proposed geological model, extend the known gold zones and search for new mineralized zones elsewhere on the property.

About Explor Resources Inc.

Explor Resources Inc. is a Canadian-based natural resources company with mineral holdings in Ontario, Quebec, Saskatchewan and New Brunswick. Explor is currently focused on exploration in the Abitibi Greenstone Belt. The belt is found in both provinces of Ontario and Quebec with approximately 33% in Ontario and 67% in Quebec. The Belt has produced in excess of 180,000,000 ounces of gold and 450,000,000 tonnes of cu-zn ore over the last 100 years. The Company is headquartered in Quebec and was incorporated in Alberta in 1986.

This document may contain forward-looking statements relating to Explor's operations or to the environment in which it operates. Such statements are based on operations, estimates, forecasts and projections. They are not guarantees of future performance and involve risks and uncertainties that are difficult to predict and may be beyond Explor's control. A number of important factors could cause actual outcomes and results to differ materially from those expressed in forward-looking statements, including those set forth in other public filing. In addition, such statements relate to the date on which they are made. Consequently, undue reliance should not be placed on such forward-looking statements. Explor disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, save and except as may be required by applicable securities laws.
